SKILLS

PROGRAMMING

Languages

- Advance: Python, Java
- Intermediate: C, C++
- JavaScript

Tools

- GIT • Linux • Windows

Frameworks

- Django

Technologies

- HTML • CSS
- SQL • PostgreSQL
- Java (Android Development)
- AWS services

OTHERS

- Content Creation
- Video Editing
- Public Speaking
- Exploring new technologies

EDUCATION

MCA, Computer Application

Dravidian University Kuppam
2022-24 | Kuppam
CGPA: 8.4

BSC, Computer Science

Dravidian University Kuppam
2018-21 | Kuppam
CGPA: 7.9

LANGUAGES KNOWN

- English • Telugu • Kannada

ACHIEVEMENTS

Robotic Operating in

Computer System : Participated and demonstrated robotic operations in the Agastya Alumni Program at Gudupalli, 2017.

EXPERIENCE

Freelance Web Developer Self-Employed | Jan 2025 - Present |

Kuppam, India **FULL-STACK Django | AWS | HTML5 | CSS3 | JavaScript |**

Postgresql | Git

Designed and deployed custom Django web applications for multiple clients with full-stack implementation.

Configured AWS EC2 instances with Nginx reverse proxy and Gunicorn WSGI servers for production deployments.

Implemented responsive UI designs with HTML5, CSS3, and JavaScript for mobile-first user experiences.

Managed version control workflows using Git/GitHub with systematic commit history and branching strategies.

Provided ongoing technical support, maintenance, and optimization services for deployed applications.

PROJECT(S)

Manovastra - Full-Stack E-Commerce Platform Django | Python | SQLite3 | HTML5 | CSS3 | JavaScript | AWS EC2 | Nginx | Gunicorn

Problem: Small ethnic wear retailers lack affordable, production-ready e-commerce platforms with complete product and inventory management.

Developed a production-ready e-commerce platform for ethnic wear (sarees, wedding collections) with complete product management and user authentication.

Designed dynamic product catalog with multi-category display, carousel navigation, and product filtering for Bestsellers, Wedding, and Ready-to-Wear sections.

Built custom Django Admin Dashboard with bulk operations, image management, and real-time inventory control.

Implemented fully responsive UI supporting 320px to 2560px viewports using Flexbox and Grid with mobile-first approach.

Deployed on AWS EC2 with Nginx reverse proxy, Gunicorn WSGI server, and systemd service for continuous uptime.

Managed complete development lifecycle with Git version control tracking 50+ commits.

Live AWS EC2 Production Instance |
